### Directions:

Write an expression that uses at least 3 different arithmetic operators.

The expression should equal **42**.

**Hint:** **+**, **-**, **\***, **/**, and **%** are possible arithmetic operators

### Your Code:

```
1  /*
2   * Programming Quiz: First Expression (2-1)
3   *
4   * Write an expression that uses at least three, different, arithmetic operators
5   * to log the number 42 to the console.
6   */
7
8  // this expression equals 4, change it to equal 42
9  console.log((1 + 5) *14/2);
10
```
