

Frequently Asked Questions on Installation

- Some NPM error causes ERROR exit (中国大陆地区用户请特别注意此问题)?

“

Check out <https://github.com/KylinOLAP/Kylin/issues/35>

- Can't get master address from ZooKeeper" when installing Kylin on Hortonworks Sandbox

“

Check out <https://github.com/KylinOLAP/Kylin/issues/9>.

- Install scripted finished in my virtual machine, but cannot visit via <http://localhost:9080>

“

Check out <https://github.com/KylinOLAP/Kylin/issues/12>.

- Map Reduce Job information can't display on sandbox deployment

“

Check out <https://github.com/KylinOLAP/Kylin/issues/40>

- Install Kylin on CDH 5.2 or Hadoop 2.5.x

“

Check out discussion: https://groups.google.com/forum/?utm_medium=email&utm_source=footer#!msg/kylin-olap/XoGZfsX1jLc/nzs6xAhNpLkJ

I was able to deploy Kylin with following option in POM.

<hadoop2.version>2.5.0</hadoop2.version>

<yarn.version>2.5.0</yarn.version>

<hbase-hadoop2.version>0.98.6-hadoop2</hbase-hadoop2.version>

<zookeeper.version>3.4.5</zookeeper.version>

<hive.version>0.13.1</hive.version>

My Cluster is running on Cloudera Distribution CDH 5.2.0.
