

Integrate Metrilo with your Magento store in 3 easy steps

1

Intstall the Metrilo extension

2

Configure your API token and secret

3

Import your historical orders

1

Install the extension through the Magento marketplace

2

After installing it, go to **Stores -> Configuration** and find the **Metrilo Analytics settings** (in the screenshot). Enable the plugin and enter your **API token** and **API secret** from your Metrilo account. Click "Save config". You'll be prompted to refresh your cache.

Configuration

ADVANCED	

Note: You can have separate API token and API secret for different Store Views - so if you can sync different store views to different Metrilo accounts.

3

After setting up your API token and API secret and refreshing your cache, you can import your historical orders in Metrilo so that it can do accurate reporting on your customers retention and LTV.

Just pick a **Store View from the dropdown** and you'll be shown the **"Import orders"** button for the selected store view. Click it and wait for the orders to be synced with Metrilo.
