## 1. Fourier series of a square wave

Period = 2ms

Peak-to-peak value = 2V

Average value = 0V

$$x(t) = \frac{4}{\pi} \sum_{n=0}^{\infty} \frac{1}{2n+1} \sin((2n+1)2\pi f_0 t)$$

## 2. Fourier series of a sawtooth wave

$$x(t) = \frac{2}{\pi} \sum_{n=0}^{\infty} (-1)^{n+1} (\sin n\omega t / n)$$

## 3. Fourier series of a triangular wave

$$x(t) = \frac{8}{\pi^2} \sum_{n=0}^{\infty} (-1)^n [\sin((2n+1)\omega t) / (2n+1)^2]$$

4. Find the approximate CFS harmonic function of a periodic signal  $x(t)$  where

$$x(t) = \sqrt{1-t^2}, \quad -1 \leq t \leq 1$$

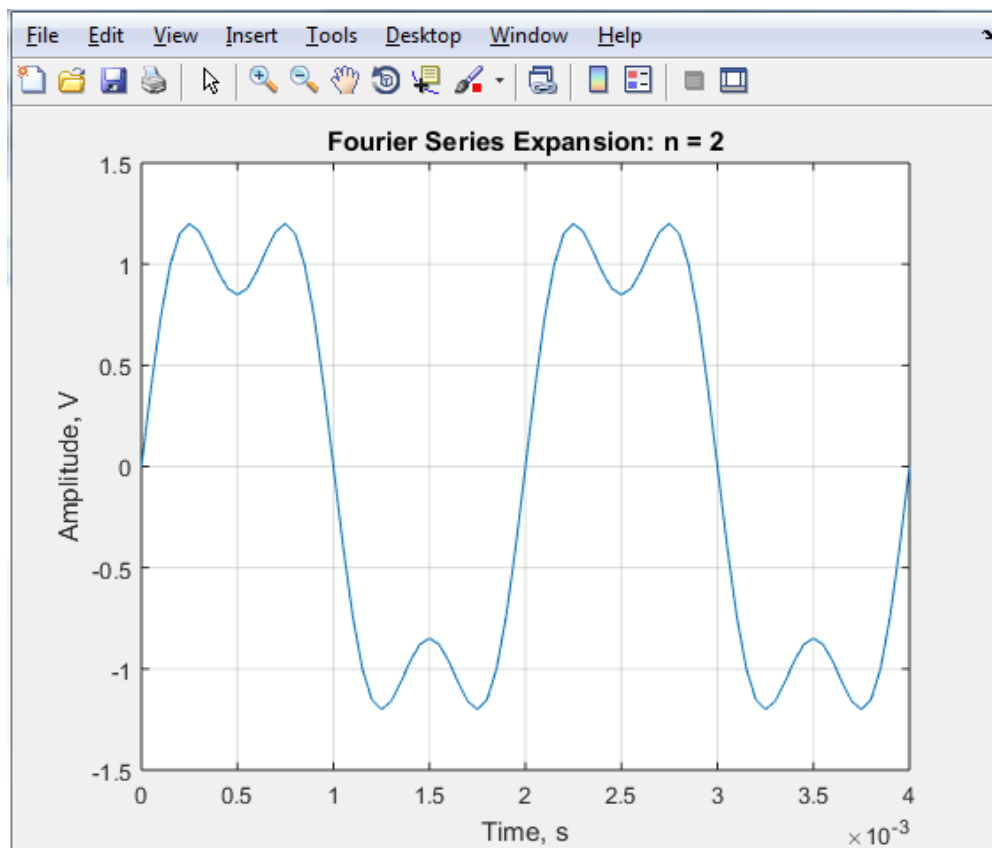

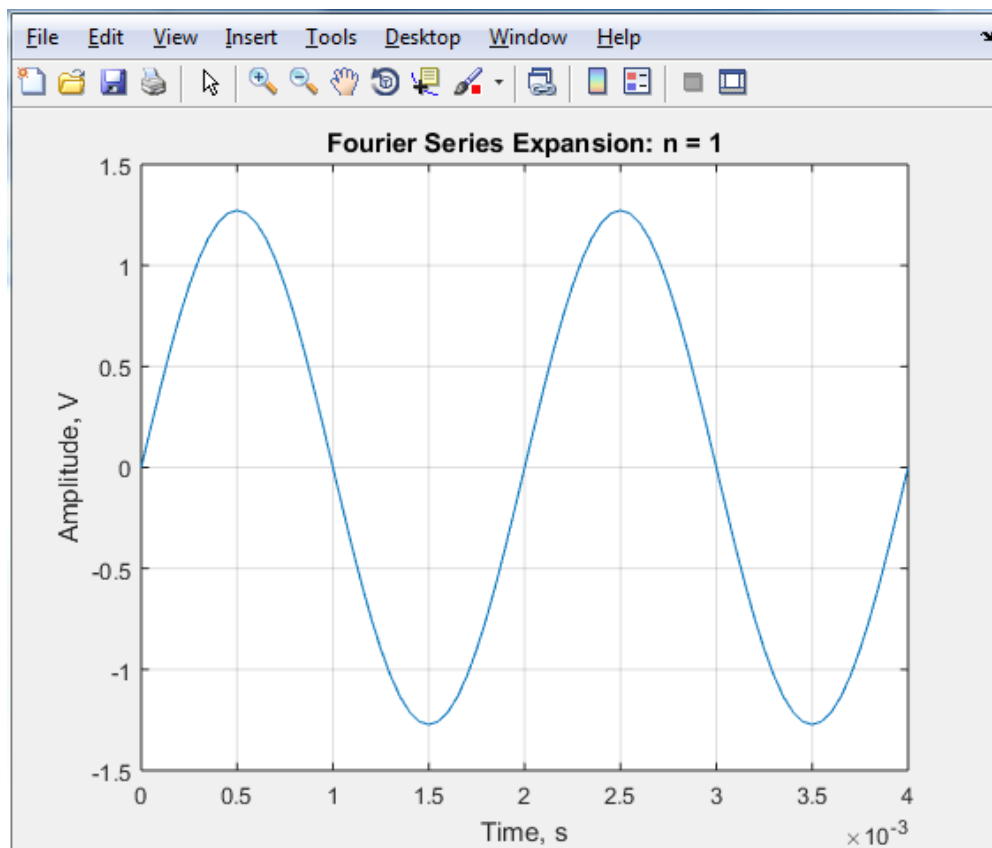

Should not use built-in functions
