

Kraków, 30 November 2020

SECURITY CERTIFICATE

Securitum is a consulting firm carrying out security audits as well as penetration tests.

We hereby confirm we have conducted a code review of version 8.2.0 (<https://github.com/handsontable/handsontable/releases/tag/8.2.0>).

The security tests were carried out in accordance with generally accepted methodologies, including OWASP TOP10 and OWASP ASVS (in a selected range).

The security testing concluded by our auditor on November 2020 confirm that there are no critical or high vulnerabilities. Auditor doing the work has 5+ years of experience in similar projects, including vulnerability discovery in openssh resulting in Mitre's CVE.

Securitum confirms that Handsontable have built the application with security in mind, including best security practices.

Sincerely,

Radosław Stachowiak
CEO
