

Frequently Asked Questions (FAQs)

This Frequently Asked Questions (FAQ) document provides more information about the Relic Bazaar Shopping app. Please review this FAQ document to learn more.

Question: What is Relic Bazaar App?

Answer: We propose an app with the vision to put back the traditional market of vintage on the tides of the ecommerce boom!. The UI is specially made to provide a retro feel. We are using a blockchain based system for payments behind the scenes to ensure privacy and encryption. The registration is simple and can be done using one's Google account as well. Using some beautiful yet concise forms we eliminate the paperwork for sellers. The recommendation engine tends to learn over time about one's taste and suggests similar items to buy. Computer vision based techniques are used for quality assessment.

Question: How does the App work?

Answer: The app can be as simple or as complex as your needs! Isn't that great?

At its very basic, the app opens with a list of vintage products.

Then you can add your items directly into the cart list, to be even more convenient. Simply tap the product, view its details and if you like the product you can directly add it to your cart.

Settings – List – Enables notifications(disable/enable features), your orders screen, FAQs, manage address, change username/password, etc.

If you need help with any of the features, or for general questions, please do not hesitate to get in touch with us.

Question: Is the payment secured?

Answer: We are using a blockchain based system for payments behind the scenes to ensure privacy and encryption.

Question: How to register on the App?

Answer: The registration is simple and can be done using one's Google account as well.

Question: What makes our App different from other Apps?

Answer: With the boons of internet 🌐 spreading worldwide over the last two decades, e-commerce has evolved to be one of the largest industries 📈!. With the passage of time, platforms like Amazon, E-Bay, Flipkart, Myntra have become the modern supermarkets for us.

From our fashionable clothes 👗, shoes 👟, grocery 🛒, items of daily needs to mobile phones 📱 we are accustomed to buy almost everything online. Even our food! 🍔. Features like flexible options of payment, tons of choices to select from, assured delivery as well as great customer support have paved the way for the notion.

However, we found there's something that is left behind on the e-commerce wave.

The Vintage Products...Yes those items of immense cultural significance or historical importance. Maybe those coins from pre-independent India, that chair from the royal family or perhaps the autograph or souvenir your family members might have got from Mother Teresa. Trading with such items is a big hassle. Sometimes people are afraid to do so because of the notion that it is illegal. At times, they are fooled by middlemen who buy them in some hundreds of dollars and sell it in thousands. Additionally, there are issues of authenticity as well delivery!

Question: What if I have additional questions?

Answer: Please send along any questions to us at @dumm@gmail.com
