

Test passes if the first black "x" is taller and wider than the first orange "x" and shorter than the second orange "X". The second black "X" needs to be the same height as the second orange "X". The black "1" needs to slant to one side.

The image shows three handwritten characters: a lowercase 'x', an uppercase 'X', and a numeral '1'. Each character has small black arrows indicating the direction of the pen strokes used to form them. The 'x' is formed with two strokes: one starting from the top left and moving down to the right, and another starting from the top right and moving down to the left. The 'X' is formed with two strokes: one starting from the top left and moving down to the right, and another starting from the top right and moving down to the left. The '1' is formed with a single stroke that starts at the top right and slants down to the left.
