# Performance Dashboard Extension

## Installation Guide

[Introduction](#)

[Installation using Composer](#)

[Installation using ZIP File](#)

[After Installation](#)

[Uninstall](#)

## Introduction

This guide explains two installation methods. Using Composer is the preferred method. It is easier and makes it possible to use Composer in the future to upgrade the extension.

## Installation using Composer

1. Open a terminal window or SSH shell
2. Go to your Magento 2 root dir
3. Execute:

```
composer config repositories.magehost_performance-dashboard vcs \
    git@github.com:magehost/performance-dashboard.git
composer require magehost/performance-dashboard:1.* --no-update
composer update magehost/performance-dashboard
php bin/magento module:enable MageHost_PerformanceDashboard
php bin/magento setup:upgrade
php bin/magento setup:di:compile
php bin/magento setup:static-content:deploy
```

## Installation using ZIP File

1. Download the ZIP file from the Magento Marketplace or from <https://github.com/magehost/performance-dashboard/releases>
2. Unpack the ZIP file
3. In your Magento installation create the directory: **app/code/MageHost/PerformanceDashboard**
4. Move the content of the ZIP file to this directory
5. Open a terminal window or SSH shell
6. Go to your Magento 2 root dir
7. Execute:

```
php bin/magento module:enable MageHost_PerformanceDashboard
php bin/magento setup:upgrade
php bin/magento setup:di:compile
php bin/magento setup:static-content:deploy
```

## After Installation

After installation you can follow these steps to open the Performance Dashboard:

1. **Log in** on your Magento Store **Admin**
2. Open the **System** menu from the left sidebar
3. In the **Tools** category click on **Performance Dashboard**
4. The Performance Dashboard will open

## Uninstall

You can skip the '`composer remove`' command if you did not use Composer to install the extension.

1. Go to your Magento 2 root dir
2. Execute:

```
php bin/magento module:disable MageHost_PerformanceDashboard  
composer remove magehost/performance-dashboard  
php bin/magento setup:upgrade  
php bin/magento setup:di:compile  
php bin/magento setup:static-content:deploy
```
