

Field Descriptions for the Biodiversity Information Networks Database

Network Name

Full name of the network. Any acronyms should be spelled out and removed from the listing.

Network Website

Web address (URL) of the network web site.

Network Description

A short description of the network.

Language

Main network language.

Last Accessed Date

Date when the network was last accessed.

Geographic Scope

The geographic scope of the network. Examples include names of states, countries, or the term "Global". Where multiple locations are included, they should all be listed.

Comments

Enter any comments that do not fit into any other fields.
